Professional Summary

AI/ML Engineer graduating from LD College of Engineering (2026), with hands-on experience across 3 internships building production AI systems. Specialized in deep learning, NLP, RAG pipelines, and end-to-end workflow automation. Proven ability to reduce manual processing time by 60%, integrate LLM APIs at scale, and deploy ML models to production via REST APIs.

Technical Skills

- **Languages:** Python, Java, SQL
- **AI/ML Frameworks:** TensorFlow, PyTorch, Scikit-learn, Keras, OpenCV, Hugging Face Transformers, Diffusers, LangChain, LangGraph
- **Key Concepts:** Deep Learning (CNNs, Transformers, RNNs), Computer Vision, NLP (Sentiment Analysis, Summarization, RAG), Fine-tuning, AI Agents, Embeddings, Model Quantization, MLOps, Model Versioning, Model Deployment, Vector Databases, Prompt Engineering
- **Automation & Integration:** n8n Workflow Automation, REST API Development, Webhook Integration, Real-time Data Pipelines, Multi-platform Integration
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, MySQL, Google Cloud Platform, OpenAI API, Google Gemini API, Pinecone, Streamlit, Telegram API, Discord API, Gmail API, Google Calendar API

Education

LD College of Engineering | Ahmedabad, Gujarat Aug 2022 – May 2026
B.E. in Artificial Intelligence and Machine Learning **CGPA: 8.35 / 10.0**
• **Coursework:** Deep Learning, Neural Networks, Computer Vision, DBMS, Data Structures & Algorithms

Experience

AI Automation Intern | *Pucho.ai* Mar 2026 – Present
• Engineered end-to-end AI automation workflows on internal platform, reducing manual processing time by **60%**
• Architected RAG pipelines integrating OpenAI and Google Gemini APIs for context-aware, real-time automation
• Designed Tally SQL automation for intelligent query generation and automated financial data processing
• Built event-driven data pipelines using REST APIs and webhook architectures for scalable client deployments

AI/ML Intern | *Intelivita Private Limited* Jan 2026 – Mar 2026
• Developed and deployed production ML models using Python and Scikit-learn for real-world business applications
• Built end-to-end ML pipelines covering training, evaluation, and model versioning via REST API integration
• Executed feature engineering pipelines that improved model predictive accuracy across multiple client projects

AI/ML Research Intern | *Suvidha Foundation* Jul 2025 – Aug 2025
• Implemented **10+ NLP models** (PRIMERA, BART, PEGASUS, T5, Longformer) for multi-document summarization
• Fine-tuned TG-MultiSum and Absformer on CNN/Daily Mail dataset; evaluated with ROUGE-1/2/L metrics
• Optimized GPU/TPU training with reproducible, version-controlled pipelines; contributed to publishable research

Certifications and Courses

Complete Data Science, ML, Deep Learning & NLP Bootcamp Apr 2026
Udemy · Krish Naik, KRISHAI Technologies · 99 hours

Deep Learning Specialization 2024
Coursera · DeepLearning.AI · Achieved 95%+ accuracy on benchmark project

Advanced Learning Algorithms 2024
Coursera · Andrew Ng

Artificial Intelligence with Python 2023
Microsoft

Projects

Facial Emotion Detection with CNN

 [GitHub](#)

- Achieved **71% accuracy** on FER-2013 with a custom CNN; optimized for real-time inference at **<40ms latency**
- **Stack:** Python, TensorFlow, Keras, OpenCV, Scikit-learn

AI Image Generation with Stable Diffusion

 [GitHub](#)

- Built a Streamlit web app for text-to-image generation with cross-platform support (CPU, CUDA, Apple Silicon MPS)
- **Stack:** Python, Streamlit, PyTorch, Hugging Face Transformers, Diffusers

RAG Pipeline and Intelligent Chatbot

- Built a production chatbot using RAG with Pinecone vector DB and OpenAI API for context-aware real-time Q&A
- **Stack:** n8n, OpenAI API, Pinecone, LangChain

Stock Analysis Assistant – Telegram, Claude AI & GPT-4 Vision

- Automated stock chart analysis using GPT-4 Vision and Claude AI; delivered financial insights via Telegram in real time
- **Stack:** Telegram API, Claude AI, GPT-4 Vision, n8n, Python

Angie – Personal AI Assistant (Voice & Text via Telegram)

- Built a full-featured AI assistant with voice/text NLP, task management, and intelligent reminders via Telegram
- **Stack:** Telegram API, OpenAI API, Google Gemini, n8n, Python
